

## PT2000 PHOTO TERMINAL

### PT2000 PHOTO TERMINAL

The PT2000 Photo Terminal provides a customer friendly digital photographic printing solution in a compact counter top terminal. The PT2000 Photo Terminal combines a wide range of media support and a flexible software platform to provide a digit photo experience that your customers expect from you. The standard configuration yields superior performance and excellent value to your retail store.

### SOFTWARE

Pixology Kiosk software provides superior and innovative work flows that both enhance and simplify the customer experience. The *Express* ordering feature allows for customers with a single selection to order all photos on their digital camera card. For customers that wish to have multiple prints and sizes the *Browse* mode provides a more flexible selection to enable the customer to get exactly the results they want. Included in the software is Pixology IRISS, the world's first fully automatic red-eye removal technology— no customer intervention required.

### CUSTOMIZATION & BRANDING

The flexible software platform provides for easy branding including customized walk up screens, promotional screen savers, and individual receipt printing options. Configuration is easy, password protected software tools allow for quick and easy adjustment of prices and product offerings.

### PRINTING OPTIONS

The PT2000 Photo Terminal can be connected to almost any combination of FotoPoint supplied printers, other printers, in store digital mini labs, and network based printing options.
